### Use of the GEEA Criteria and Database

The Group for Energy Efficient Appliances (GEEA) invites other organisations or institutions, which are active in the promotion of energy efficient appliances to use the data and information that it has developed. GEEA recognises that in many parts of Europe and the world other labels signifying energy efficiency and environment friendliness have been developed. Therefore GEEA encourages that the technical information – criteria and database - is used in conjunction with such other labels provided that the conditions below are observed.

Please write us a letter on the letterhead paper of your organisation – using the text on the following page - add the relevant information (please ensure that all contact information, including e-mail address of the contact person, is included) and send/fax it to the GEEA secretariat.
