

Product Sheet  
**Fax Machines (stand alone)**

### Scope

Fax machines, including those with additional functions such as an integrated telephone, integrated answering device, etc. Fax machines integrated into personal computers are not included in this product group. The models concerned must be available through the trade in Europe in the same configuration as indicated in the registration. The product as sold to the customer should be able to operate on mains voltage (230 Vac). This includes portable equipment that is sold with an external power supply.

### Criteria

Fax machines are eligible for the GEEA Label if the following criteria are met:

Category	Criteria	Criteria valid till*
All fax machines	The power consumption in the <b>sleep mode</b> is <b>1 W</b> or less.	31.12.2005
	The <b>default delay time</b> before the equipment switches into the sleep mode is <b>5 minutes</b> or less.	31.12.2005

\* See Rules of Registration Procedure

### Compliance with the Energy Star MoU

The compliance with Energy Star can be indicated as follows (X = full compliance).

Mode	Definition	Test Method	Criteria
Sleep	X	X	

### Definitions and Test Method

Definition and test method for sleep mode are equal to current Energy Star definition and test method.
